

OKVM221

2-Port KVM Switch with VGA and USB Ports

2 PCs, monitor: VGA, keyboard: USB Type-A, mouse: USB Type-A, desktop controller, desktop, metal casing

OKVM221 is a compact 2-port KVM switch with built-in KVM cables with VGA and USB connectors.

The ORIGO OKVM221 KVM switch allows you to manage up to 2 PCs with one monitor, keyboard and mouse. You can switch between PCs using the button located on the top panel, hot keys and the desktop controller.

The OKVM221 KVM switch doesn't require driver installation and can work with computers with different operating systems installed. This KVM switch supports hot-plugging - you don't need to turn your computers off before installing the device. Autoscan mode provides automatic switching to the next PC after the scan interval expires.

A compact design with powering from USB bus allows you to place the KVM switch on your desktop.

Key Features

- Manage up to 2 PCs with USB and VGA ports via one KVM console
