

OKVM440

8-Port KVM Switch with VGA and USB Ports

8 PCs, monitor: VGA, keyboard: USB Type-A, mouse: USB Type-A, 19" rack mounting

OKVM440 is a 8-port KVM switch with VGA and USB ports (19" rack mountable).

The ORIGO OKVM440 KVM switch allows you to manage up to 8 PCs with one monitor, keyboard and mouse. You can switch between PCs using the buttons located on the front panel, the IR remote controller and the desktop controller.

The OKVM440 KVM switch doesn't require specialized software installation and can work with computers with different operating systems installed. This KVM switch supports hot-plugging - you don't need to turn your computers off before installing the device. The package contents include four 1.8 m KVM cables. Autoscan mode provides automatic switching to the next PC after the scan interval expires.

The KVM switch is also equipped with two additional USB ports for sharing external hard drives and USB storages.

The OKVM440 KVM switch can function without external power adapter by powering from USB port of your PC. The 19-inch rack mount kit is included.

Key Features

- Manage up to 8 PCs with USB and VGA ports via one KVM console
