

OMCF20SC-BXD

**100Base-TX / 100Base-FX (SC) WDM Media Converter
(Tx:1550 nm, Rx:1310 nm, Single-mode, 20 km)**

OMCF20SC-BXD is a WDM media converter with one 100Base-TX port and one 100Base-FX with SC connector for single-mode fiber cable (up to 20 km).

The ORIGO OMC20SC-BXD media converter converts a twisted-pair 100Base-TX Fast Ethernet connection to a fiber 100Base-FX Fast Ethernet connection.

OMCF20SC-BXD supports WDM technology and works in pair with OMC20SC-BXU. The devices provide data reception and transmission at a distance of up to 20 km over one single-mode fiber cable using two different wavelengths. OMC20SC-BXD transmits data over fiber strand using 1550 nm wavelength and receives data using 1310 nm wavelength.
